

SECURING WATER FOR FOOD:

A GRAND CHALLENGE FOR DEVELOPMENT

Who We Are

Securing Water for Food aims to enhance access to innovations that help agricultural producers grow more food with less water, enhance water storage, and improve the use of saline water and soils to grow or process food. Through a competitive process, the program has pre-screened and selected only the highest potential water-for-food innovations and is providing grant funds and ongoing acceleration assistance to support their business development. **Learn more about the \$7.5 million Securing Water for Food 4th Global Call for Innovations at www.securingswaterforfood.org/4thcall.**

What We Focus On

Efficiency

Helping farmers use water more effectively

Salinity

Removing salt from water to make more food

Storage

Improving water storage for lean times

How Securing Water for Food Works

GROWING MORE FOOD WITH LESS WATER

Approximately 70 percent of the world's freshwater supply is used for agriculture. As the world's population continues to rise, we'll need more water to grow enough food. Further compounding this issue is climate change, which affects the salinity of soils and water and changes the way farmers work.

THE CHALLENGE

Since 2013, Sweden through the Swedish International Development Cooperation Agency (Sida), the Government of South Africa, and the Ministry of Foreign Affairs of the Kingdom of the Netherlands have invested \$32 million and provided critical acceleration support to promote science and technology solutions that enable the production of more food with less water and/or make more water available for food production, processing, and distribution in developing and emerging countries.

Securing Water for Food's approach is as unique and innovative as the 30 solutions supported. Decision-making is driven by hard data and evidence. Once innovations reach pre-established milestones, the Securing Water for Food Technical Assistance Facility provides advisory and acceleration services, grants and financial management support, M&E guidance, and connections to a variety of partners and networks.

THE IMPACT

Since 2013, over 280,000 people in 25 countries have benefitted from our investments. We've been able to save 250 million liters of water – enough to fill 200 swimming pools – and to produce nearly 4,000 tons of food. This approach has been so successful, we are taking the lessons we have learned and are applying them to achieve our broader water goals across the SWFF partnership.

Timeline

FIRST CALL FOR INNOVATIONS

Announced in November of 2013, 16 innovators received over \$6.5 million in funding to scale up access to commercially viable water approaches.

THE DESAL PRIZE

Released on World Water Day 2014, this over \$1.5 million call uncovered two environmentally sustainable, small-scale brackish water desalination system solutions.

THIRD CALL FOR INNOVATIONS

Launched in March 2015, 12 awardees were chosen from over 400 applicants from 67 countries for their focus on cutting-edge, advanced technologies and business models, as well as innovations that engage women. The awardees will receive between \$100,000 and \$3 million in funding and acceleration support to bring their innovations to scale.

Innovators from the Portfolio

WATER CAPTURE & STORAGE

- WaterBoxx for Water Collection
- WaterPads for Plant Water Retention at Root Level
- Hydro-Powered Pump
- Sandbar Cropping

WATER EFFICIENCY & REUSE

- Affordable Greenhouses
- Irrigation Design & Installation App
- Silicic Acid for Resilient Crops
- Solar-Powered Drip Irrigation
- Mobile Weather Data for Farmers

SALINITY & SALT WATER INTRUSION

- Salt Tolerant Potatoes
- Salt Tolerant & Drought Resilient Seeds
- Photovoltaic-Powered (PV) Electrodialysis Reversal Desalination System
- Zero Discharge Desalination Technology (ZDD)

Partner With Us

Securing Water for Food represents a multi-governmental partnership aimed at tackling one of the world's greatest challenges—water and food security. To reach our goal, we seek connections and strategic relationships that help our innovators test, implement, and scale water for food solutions.
